E-mail: jk_science1999@yahoo.com, annil_mahajan@rediffmail.com

Scope of Journal

JK Science is a Multi-disciplinary Medical Journal. It welcomes articles from all medical specialties. It accepts Editorial (Invited only), Review Articles, Original Articles, Case Reports, Research letters, Drug Reviews & Images.

Preparation of Manuscripts

Manuscripts must be prepared in accordance with "Uniform requirements for Manuscripts submitted to Biomedical Journals" developed by the International Committee of Medical Journal Editors (ICMJE, October 2008). The uniform requirements and specific requirement of “JK Science” are summarized below. Before submitting a manuscript, contributors are requested to check for the latest instructions available.

1. Manuscripts should be submitted in British English in MS word with double spacing, and margins 2.5 cm from all four sides.
2. Structured abstract for Original Articles, Systematic Reviews and Meta-analyses, and unstructured abstract for Review Articles, Case Reports/Case Series or Drug Reviews.
3. In case of Original Articles, abstract should include a brief description of background/justification of the study, aims/objectives, study design, material and methods, results, and conclusion of the study.
4. Abstract of the article should be upto 150-200 words in case of original articles and review articles, and <100 words for case reports/case series with 3–5 key words.
5. Text should include Introduction, Material and Methods, Results, Discussion and Conclusion. Subheadings however are not mandatory.
6. Introduction should be brief, maximum upto 250-300 words. Aims/objectives of the study should be written at the end of introduction and not as a separate heading.
7. Material and Methods Section should include (where applicable) i) Study Design (Prospective/ Retrospective, Longitudinal/ Cross-sectional, Analytical/ Descriptive, Observational/ Interventional/ Experimental, Randomised/ Nonrandomised, Individual/ Populational based, Hospital based/ Field trial); ii) Study Population (Time, Place and Person, Inclusion and Exclusion Criteria); iii) Sampling Procedure, (Type of Sample, Randomization Method/Software used); iv) Sample Size (how the Sample Size was estimated, Parameters, Software/Formula used); v) Human Subjects Protection (Informed Consent, Approval Procedures, Ethical committee approval); vi) Description of Intervention (for
Experimental Studies); vii) Data Collection Procedure (Type of Data Collected, Data Collection Tools used); and viii) Data Analysis Procedure (Data entry, Software used for Data Analysis).

8. Actual Methods and Procedures are to be detailed and supported by References. Submit CONSORT Statement while reporting RCT.

9. Standard abbreviations are accepted and actual units of measurement should be in metric or SI units.

ED = Editorial; RA = Review Article; OA = Original Article; CR = Case Report; DR = Drug Review; NR = Not Required

Tables

1. Tables should be self-explanatory and should not duplicate textual material.
2. Tables with more than 10 columns and 20 rows are not acceptable.
3. Number tables, in Arabic numerals, consecutively in the order of their first citation in the text and supply a brief title for each.
4. Place explanatory matter in footnotes, not in the heading.
5. Explain in footnotes all non-standard abbreviations that are used in each table.
6. The tables along with their number should be cited at the relevant place in the text.
7. Tables with their titles should be included in the Manuscript File after the References Section.
8. Tables should NOT be uploaded as separate files, images or additional material.

Figures and Illustrations

1. Upload the images (Miniature photographs of x-rays, scans, tracings and clinical photographs) ONLY in JPEG (preferable) or TIFF format. The file size should be within 2MB in size while uploading.
2. Figures should be numbered consecutively according to the order in which they have been first cited in the text.
3. When you submit a COMPOSITE image consisting of several components, try to keep component images equal in size or at least maintain a symmetry of pattern - square or a rectangle.
4. Components are to be labelled as a, b, c etc. in the order that they are cited in the manuscript or the legend.
5. Use even number of component images to maintain symmetry.
6. Not to use more than 8 components in one composite image.
7. Images have to be nicely cropped to show the area of interest.
8. The photographs and figures should be trimmed to remove all the unwanted areas, specifically, all information that reveals the identity of the patient and the place of study must be masked.
9. If photographs of individuals are used, their pictures must be accompanied by a signed permission to use the photograph.
10. Plagiarized figures/images are unethical and may invoke punitive action.
11. Legends for illustrations: Type out legends (maximum 50 words) for illustrations using double spacing, with Arabic numerals corresponding to the illustrations. When symbols, arrows, numbers, or letters are used to identify parts of the illustrations, identify and explain each one in the legend. Include Legend for Figures in the manuscript file at the end, after the References Section and Tables (if any).
12. Do not include figures in the manuscript file.
13. Final figures for print production: The Production Team may request for high-quality images if the already supplied images are suboptimal in terms of quality of reproduction. In that case, ensure that the image submitted has minimum resolution of 300 dpi or 1800 x 1600 pixels, is in JPEG or TIFF format. Send the images by e-mail.
14. The Journal reserves the right to crop, rotate, reduce, or enlarge the photographs to an acceptable size.

**In-text Citation**

1. A number is allocated to the source in the order in which it is cited in the text. If the source is referred to again, the same number is used.
2. Use Arabic numerals in curved brackets (1,2,3,4,).
3. The in-text citation is placed immediately after the text which refers to the source being cited: e.g., darkest days ...... ahead (1). The author’s name can also be integrated into the text: e.g., Scholtz (1) or Scholtz et al. (1).
4. Citing more than one reference at a time: list each reference number separated by a comma, or by a dash for a sequence of consecutive numbers without any spaces. For example: (1,5,6-8).

**References**

1. References are to be written at the end of the article and numbered according to the citation in the text.
2. Use Vancouver system in preparing the references.

**Print Journal Articles**

1. Enter author’s surname followed by no more than 2 initials without full stops or commas.
2. Journal Article, up to 6 authors - give all authors’ names and separate each by a comma and a space.
3. Journal Article, more than 6 authors - List the first 6 authors then add et al.
4. Article title- Only the first word and words that normally begin with a capital letter are capitalized.
5. Journal title as abbreviations in italics without full stops or commas. The abbreviation of the titles of the journals should conform to those used in NLM Catalog, Index medicus or Excerpta medica.
6. Date of publication; volume number(issue number); page numbers as shown below in examples with no spaces in between. If the journal has continuous page numbering through its volumes, omit issue number.
7. Follow the punctuation marks carefully. Do not include unnecessary bibliographic elements such as month of publication, etc.

Examples:

Electronic Journal Articles
1. The word [Internet] in square brackets should be inserted after the abbreviated journal title.
2. The date cited [in square brackets] must be included after the date of publication.
3. The URL (web address) must be included at the end of the reference.
4. For electronic journal articles with a DOI, include the DOI (digital object identifier) at the end of the reference, after the URL.

Examples:

Books and Book Chapters
1) **Print Book**
1. **Personal Author(s):** Author AA. Title of book. # edition [if not first]. Place of Publication: Publisher, Year of publication. Pagination. e.g., Carlson BM. Human embryology and developmental biology. 4th ed. St. Louis: Mosby; 2009. 541 p.

2) **Electronic Book**

**Authorship Criteria**

1. Authorship credit should be based only on i) substantial contributions to the conception or design of the work, or the acquisition, analysis or interpretation of data for the work; ii) drafting the article or revising it critically for important intellectual content; iii) final approval of the version to be published; and iv) agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved. Conditions i, ii, and iii must be met.

2. Participation solely in the acquisition of funding or the collection of data does not justify authorship. General supervision of the research group is not sufficient for authorship.

3. The authorship should provide a justification. Each contributor should have participated sufficiently in the work to take public responsibility for appropriate portions of the content of the manuscript.

4. The order of naming the contributors should be based on the relative contribution of the contributor towards the study and writing the manuscript. Once submitted the order cannot be changed without written consent of all the contributors.

5. One author should take responsibility for the integrity of the work as a whole from inception to published article and should be designated as 'guarantor'.

6. Further, the corresponding author has the written consent from all the contributors to act as corresponding author.

7. **Acknowledgement.** One or more statements should specify: i) contributions that need acknowledging but do not justify authorship, such as general support by a departmental chair; ii) acknowledgments of technical help; and iii) acknowledgments of financial and material support, which should specify the nature of the support.

---

**Submission of Manuscripts**

- All manuscripts must be submitted on-line through the website at [https://www.jkscience.org/](https://www.jkscience.org/) or through e-mail at jk_science1999@yahoo.com or annil_mahajan@rediffmail.com.
- The submitted manuscripts that are not as per the “Guidelines” would be returned to the authors for technical corrections, before they undergo editorial/peer-review. Generally, the manuscript should be submitted in the form of following files:

**1) Title Page/Covering Letter**

1. The type of manuscript (Original Article, Review Article, Case Report/Case Series, Editorial, Research letters, Drug Reviews, Images); title of the manuscript; names of all authors/contributors (with their highest academic degrees, designation and affiliations); and name(s) of department(s) and/or institution(s) to which the work is credited. Use Microsoft Word file saved as .doc or .docx.

2. The total number of pages, total number of photographs and word counts separately for abstract and for the text (excluding the references, tables and abstract).

3. Source(s) of support in the form of grants, equipment, drugs, or all of these.

4. Acknowledgement, if any. This should be included in the title page of the manuscript and not in the main article file.

5. Registration number in case of a clinical trial and where it is registered (name of the registry and its URL)

6. Conflicts of Interest of each author/contributor. A statement of financial or other relations that might lead to a conflict of interest, if that information is not included in the manuscript itself or in an authors' form.

7. A statement that the manuscript has been read and approved by all the authors, that the requirements for authorship have been met, and that each author believes that the manuscript represents honest work.

8. The name, address, e-mail, and telephone number of the corresponding author, who is responsible for communicating with the other authors about revisions and final approval of the proofs.

**2) Article File**
1. The main text of the article, beginning from Abstract, Key Words, Body of the Manuscript or as applicable to the specific type of manuscript, References, Tables, Legend to Figures should be in this file in the specified sequence.
2. The pages should be numbered consecutively, beginning with the first page of the article file.
3. The file must not contain any mention of the authors' names or initials or the institution at which the study was done or acknowledgements.
4. Manuscripts not in compliance with the Journal's policy will be returned to the corresponding author.
5. Use Microsoft Word .doc or .docx files.

3) Images
1. Submit good quality color images.
2. Each image should be less than 2 MB in size.
3. Images can be submitted as JPEG (preferable) or TIFF files.
4. Graphs can be submitted as images separately without incorporating them in the article file.
5. Do not zip the files.
6. Legends for the figures/images should be included at the end of the article file.

4) The Contributors' / Copyright Transfer Form has to be submitted with the signatures of all the contributors via email as a scanned image.

5) Conflicts of Interest/ Competing Interests Form
It is mandatory to send the conflict of interest form for each author separately along with the main manuscript submission. Please note that the conflict of interest form is separate from the copyright transfer form.

6) Copies of Permission(s), if any.

<tr>
<td>05. Structured Abstract and 3-5 Key Words for Original Articles &amp; Unstructured Abstract for Case Reports.</td>
</tr>
<tr>
<td>06. Acknowledgements.</td>
</tr>
<tr>
<td>07. CONSORT Statement in case of reporting RCT.</td>
</tr>
<tr>
<td>08. Latest References (Vancouver style).</td>
</tr>
</tbody>
</table>
09. No repetition of Data in Tables/Graphs and in Text.
11. Photographs appropriately Marked and with Legends.
12. Submission On-line through the Website (https://www.jkscience.org/) or through E-mail
   (jk_science1999@yahoo.com or annil_mahajan@rediffmail.com).

**Sending a Revised Manuscript**

The revised version of the manuscript should be submitted online in a manner similar to that used for submission of the manuscript for the first time. However, there is no need to submit the “Title Page” or “Covering Letter” file while submitting a revised version. When submitting a revised manuscript, contributors are requested to include, the ‘referees’ remarks along with point to point clarification at the beginning in the revised file itself. In addition, they are expected to mark the changes as underlined or colored text in the article.

<table>
<thead>
<tr>
<th>Some Tips To Revise The Manuscript</th>
</tr>
</thead>
<tbody>
<tr>
<td>01. Submit revised version through website or through e-mail.</td>
</tr>
<tr>
<td>02. Go through the comments of referees carefully.</td>
</tr>
<tr>
<td>03. Carry out all corrections.</td>
</tr>
<tr>
<td>04. Highlight the changes with some different colour in revised manuscript.</td>
</tr>
<tr>
<td>05. If your data need to be re-analysed, consult biostatistician.</td>
</tr>
<tr>
<td>06. Do not ignore any comment / remark / query of the referees.</td>
</tr>
<tr>
<td>07. If you feel a comment / suggestion by the referee is incorrect / unacceptable, reply by explaining the reasons.</td>
</tr>
<tr>
<td>08. Point-by-point explanation is must.</td>
</tr>
</tbody>
</table>

**Proof Corrections**

The corresponding author will receive the designed article through email. Hence a working email address must therefore be provided for the corresponding author. Its purpose is for the essential correction of errors, to check the accuracy and positioning of tables and figures and/or approval that no further corrections are required. The proof will be in PDF (portable document format). Instructions will be sent with the proof. Corrected Proofs must be returned within three days of receipt. It may not be possible to incorporate corrections received after that period.
